

## INVENTORY CONTROL

*Flexx Inventory Control* helps you reduce inventory costs and overhead while maintaining the highest standards of customer service. With minimal administration, *Flexx Inventory Control* administers and evaluates every aspect of the buying and selling process. This enables you to quickly and accurately fine-tune your inventory levels and stock ordering, giving you an optimum balance—and a competitive advantage. Features include:

- ▲ Fractional quantities and flexible units of measure with unit conversion capability.
- ▲ Valuation by FIFO, LIFO, Weighted Average, Individual or Standard Cost.
- ▲ Unlimited item description and image attachment capability.
- ▲ Serialized and lot control tracking.
- ▲ State, VAT and GST taxation control *per item*.
- ▲ Stock can be tagged with many attributes to control all aspects of the purchasing and sales process.
- ▲ Many user-defined category and classification fields for reporting and automated price catalog production.
- ▲ Warehouse transfer and assembly build processing.
