

PURCHASING & RECEIVING

Flexx *Purchasing & Receiving* efficiently manages the acquisition and distribution of stock and supplies. Access to all aspects of purchasing information enables enhanced cash flow, balanced inventory levels and a method of measuring supplier effectiveness. And because *Purchasing & Receiving* is fully integrated with other Flexx modules, accurate purchasing history and analysis is always at your fingertips. Features include:

- ▲ Automatic PO generation based on user reorder criteria and vendor timelines.
- ▲ Unlimited ship-to locations and warehouses.
- ▲ Purchase requisition support with multi-level authorizations and fund accounting support.
- ▲ Landed cost tracking with currency conversion support.
- ▲ Pallet configuration with cube load, volume and weight calculations.
- ▲ Blanket order processing.
- ▲ Full receiving functionality including partial receipt and back order tracking with unlimited comments for quality control.
- ▲ Multi unit-of-measure support.
